Develop a simple calculator using xml-rpc

Aim:

To develop a simple calculator using xml-rpc in python to perform basic arithmentic client and a server.

Procedure:

*) install python and open a python editor

*) create the server program and define arithmetic operation.

*) Register the function with xml-rpc server

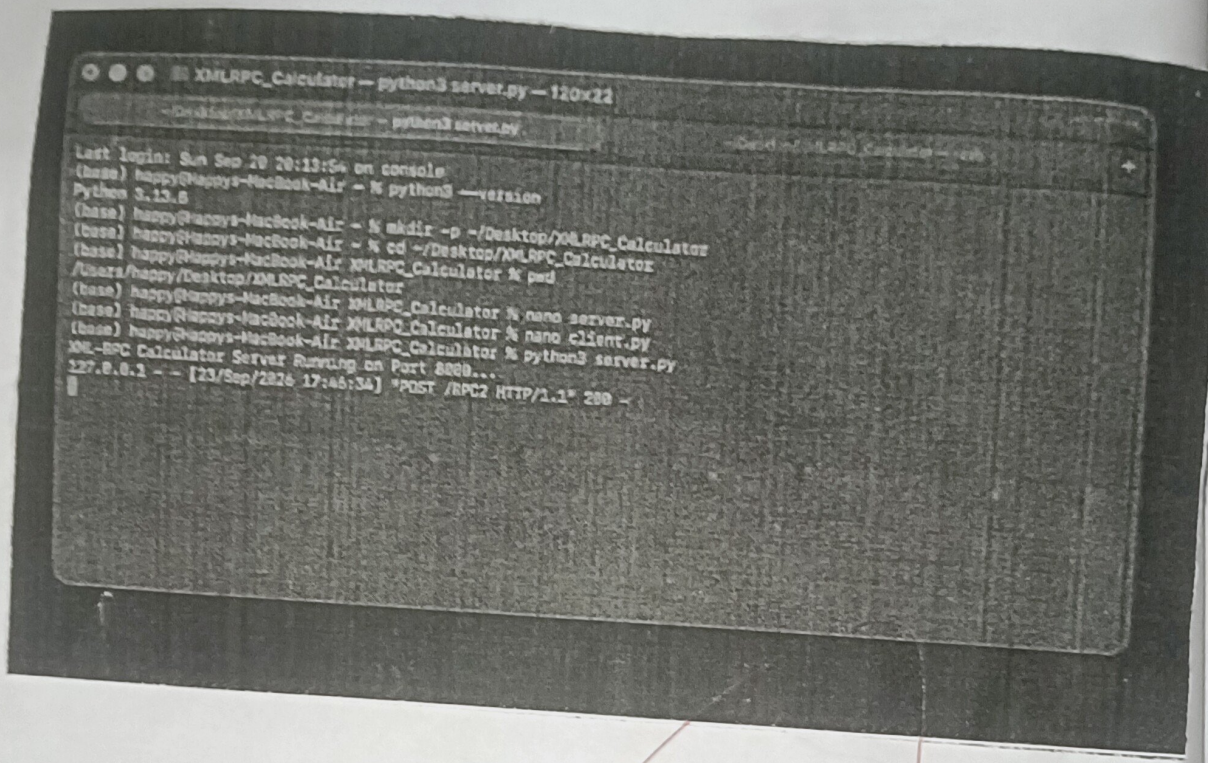

*) create the client program and connect server

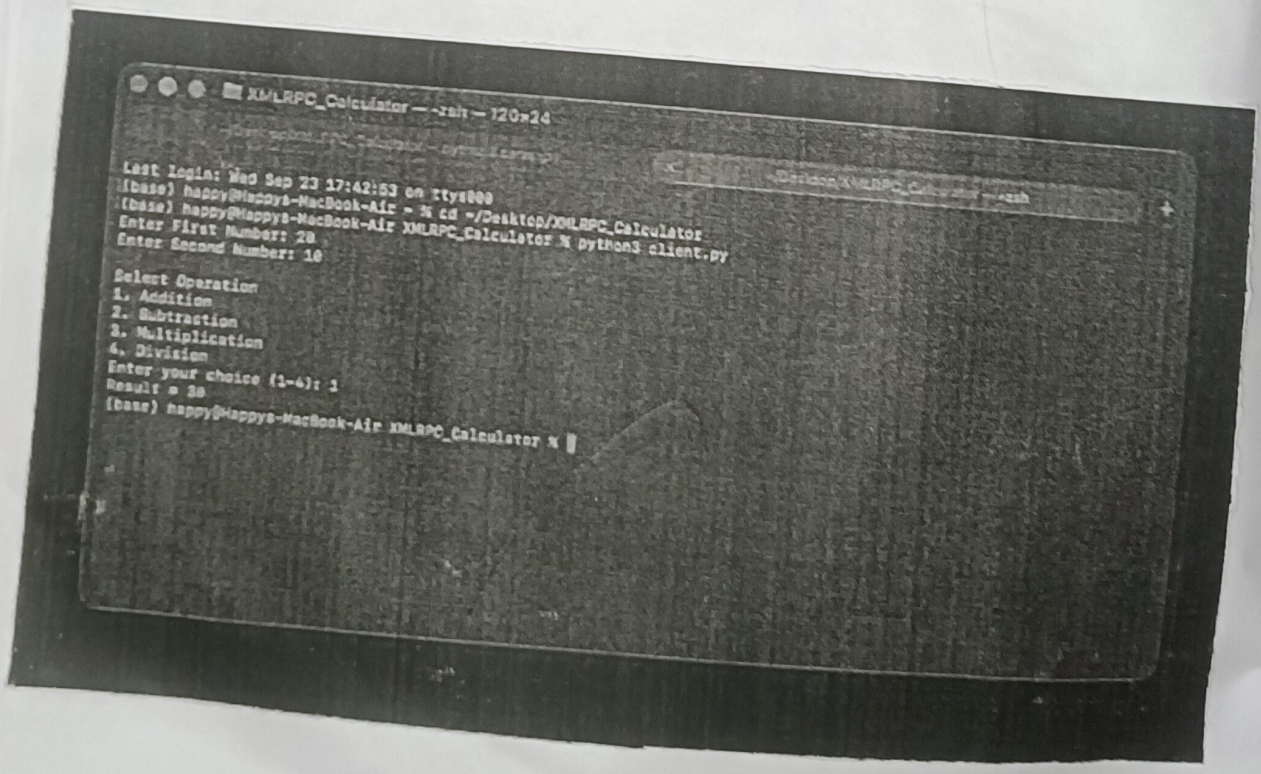

*) Enter two number and select an arithmetic operation

*) execute the client and observe the result.

Result:

A simple calculator was developed to perform arithmentic operations.
