Develop a program to create a server socke
using TCP

Aim:

To develop a TCP socket based client-server program demonstrates reliable communication between a client and a server

Procedure:

=

*) Create the server program (server.py)

*) create the client program

*) Run the server

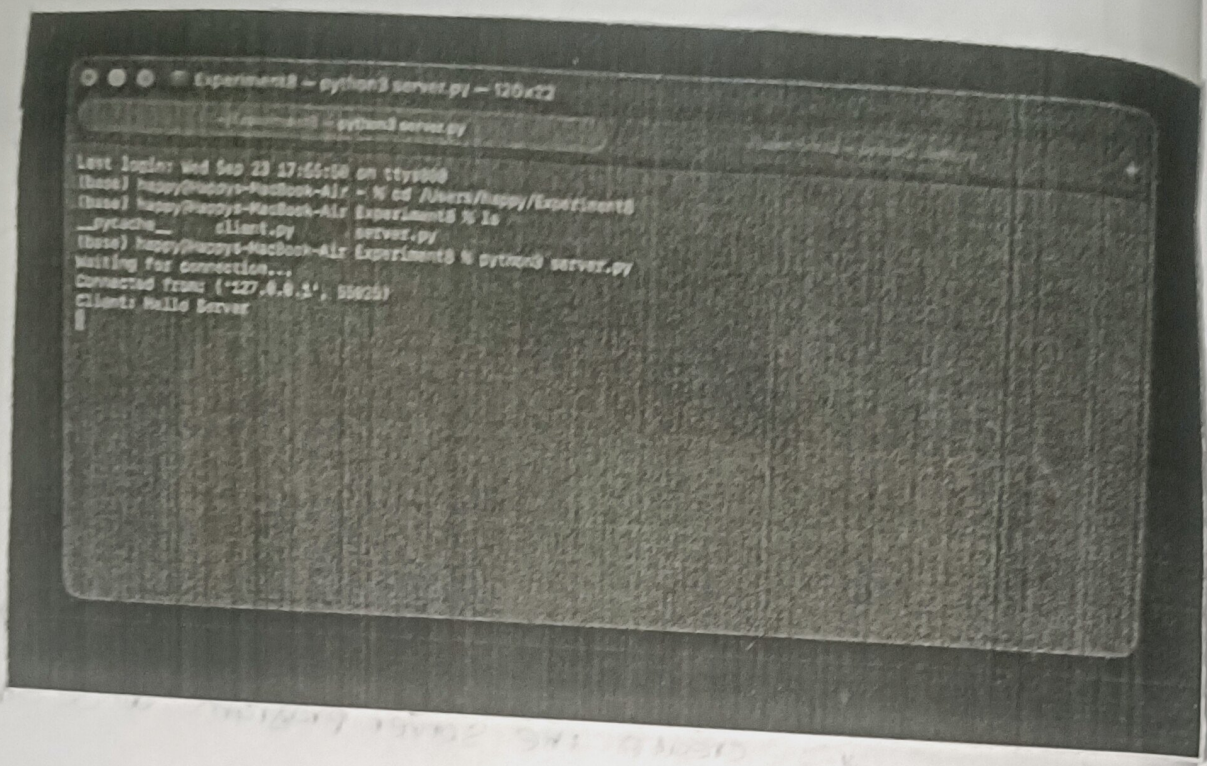

*) Run the client

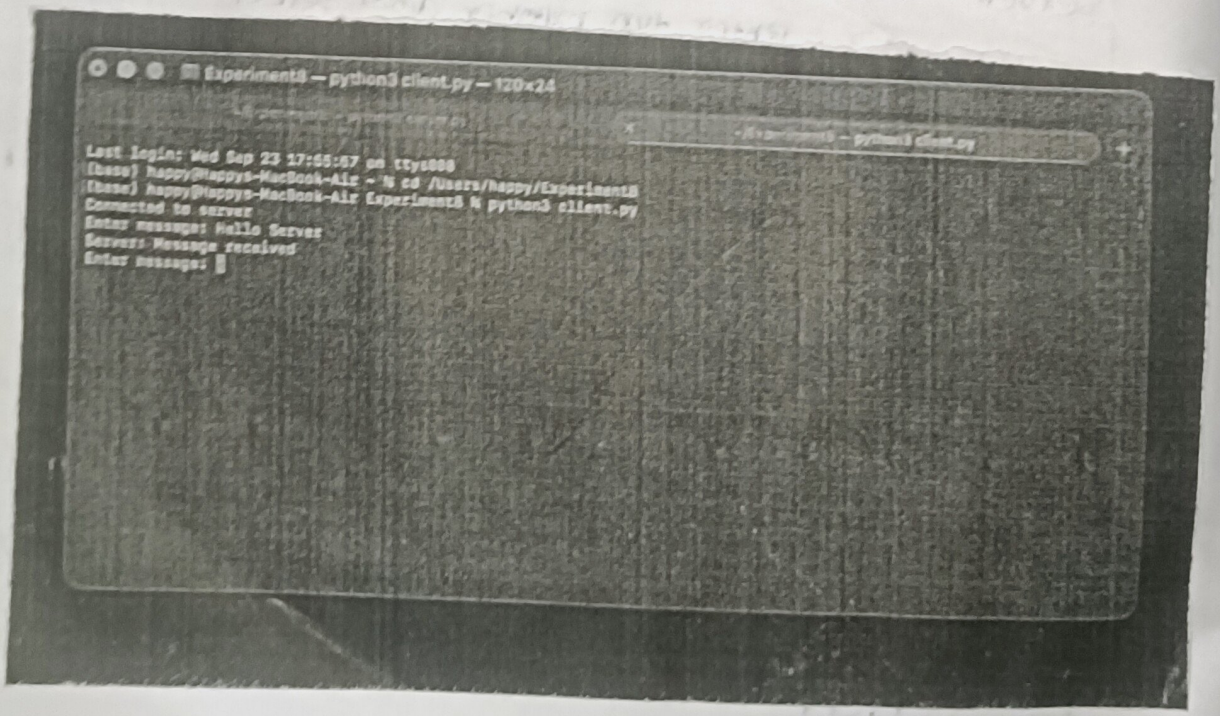

*) Test multiple messages between the client and server

Result:

=

The TCP socke program was developed executed successfully demonstrating communication between the client and server
